# **Eosinophilic Esophagitis Network of Virginia Inaugural Meeting**

**NOV. 16, 2024**

UVA Darden School of Business

**UVA Health**

Provided by the University of Virginia School of Medicine and School of Nursing

## COURSE DESCRIPTION

Eosinophilic Esophagitis (EoE) was previously considered to be a rare disease that was primarily treated in multidisciplinary clinics at academic medical centers, but over the last few decades, it has been increasingly diagnosed and managed by community providers. Moreover, there are now effective FDA-approved therapies for this disease – including Dupilumab and Budesonide, which further facilitates the management of EoE at the community level.

Patients with EoE benefit from the collaborative care of gastroenterologists, allergists, and dietitians, but there are many challenges to successful care coordination in the community. In this CME event, we will first provide an update on recent advances in the diagnosis and management of EoE. We will then discuss the nuances in treating and managing this disease from the perspective of a pediatric gastroenterologist, adult gastroenterologist, allergist, and dietitian. This will include informative presentations, question and answer sessions after each talk, and a roundtable discussion at the end of the conference where we will discuss difficult cases.

## DESIRED OUTCOMES

At the completion of the 2024 EoE Network of Virginia Inaugural Meeting, the participant should be able to understand and appreciate:

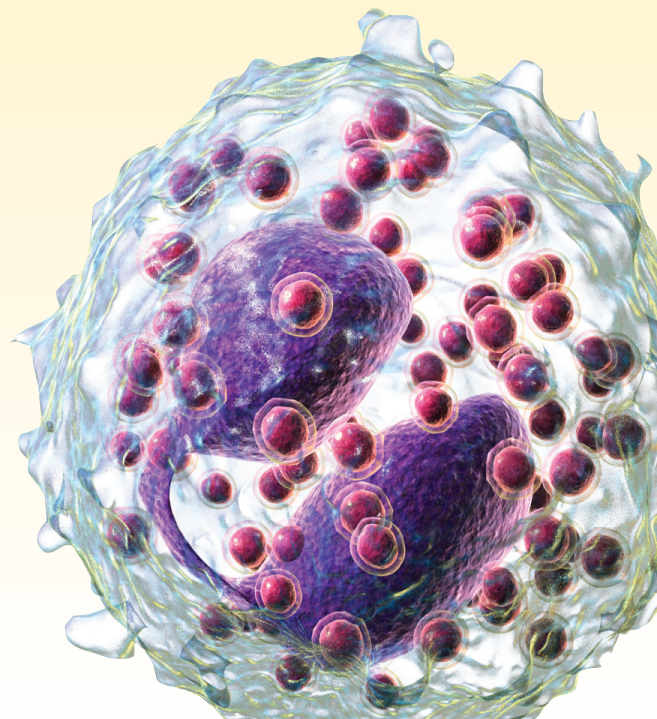

- The advances in the diagnosis and management of Eosinophilic Esophagitis (EoE) in pediatric and adult patients
- Recognize the roles of the gastroenterologist, allergist and dietitian in the management of EoE patients
- Facilitate a collaborative network of EoE providers in the state of Virginia to improve the care of patients
